Railroad	Nonvisible Boundary	Glacier
Metadata	Inset	Out Area

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

1. The following place names are used to identify the boundaries:
 - a. "MCD, A" indicates that the place is also a false MCD; the false MCD name is not shown.
 - b. "Tribal" shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity, but without numbers.
 - c. "Res" indicates reservation boundaries. Reservation boundaries are defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian reservation. Reservation boundaries are shown within the reservation trust land, but not within off-reservation trust land across state or county boundaries, the same as tribal census tract boundaries.
 - d. "County" indicates county boundaries. County boundaries are shown, and, if so, constitutes a single tribal census tract entity.
2. The following block number indicates that the block number is repeated elsewhere in the block.
